

Self-Powered 2 way DSP controlled Loudspeaker system PC remote controlled with networking

## **Audio-Performance Multip MP15-amp**

The MP15-amp loudspeaker is a powered system that combines exceptionally accurate reproduction with high SPL output in a very compact multi-purpose enclosure available as mirror symetrical left-right, to form pairs.

The MP15-amp uses a proprietary 15 inch cone low frequency driver mounted in a vented enclosure with carrying handles. The high frequency unit is a 2 inch diaphragm high frequency compression driver couple to a in house designed 40°/90°x 60° asymmetrical horn.

A unique Active Speaker Output, ASO, allows the user to connect a slave unit called MP15-S in paralell to the MP15-amp.

The MP15-amp built-in electronics package features a new lightweight, two channel class D audio power amplifier (D2SP) designed specifically for Self-Powered products.

The D2SP amplifier module is a sophis-

ticated switch mode power supply, class-D amplifier design capable of delivering more than 2 x 1'250W RMS into 2 Ohms and adding only 3Kg to the weight of the cabinet. It incorporates a complete networked 96KHz digital signal processing (DSP) providing loud-speaker specific filtering, EQ, delays and protection functions.

Sophisticated amplifier protection systems continuously monitor all aspects of performance to ensure that the amplifier and associated drivers are always working within their safe operating areas.

With an extraordinary average efficiency of 90%, the system is practically service free.

PodWare PC application provides real time control and monitoring functions to either single units or whole networks of Audio-Performance self-powered loudspeakers through Ethernet CAT5 cable.

# IDEAL FOR

Stage Monitoring
for
Musical Instruments
Singing
or
Speech

Side Fill or FOH

## Special Features

High power Self powered

Monitor & FOH presets

Active Speaker Output
ASO
Ethernet or EtherSound
Networking
PC remote controlled

#### **MULTI-PURPOSE** series

### Multip MP15-amp Specifications

#### **ACOUSTICAL**

Frequency response (1)...... 50Hz - 18KHz

Maximum peak SPL (2)...... 133dB

Coverage ...... Horizontal: 60°

Vertical: smoothly changing from 90° to 40°

**TRANSDUCERS** 

High frequency ...... 1 x 2 inch diaphragm, ferrofluid cooled compression

driver, loaded with asymetrical horn

**AMPLIFIERS** 

THD, DIM, SMPTE......<0,05%

**AUDIO INPUT** 

Type...... Analog Differential balanced input circuit

Digital via Ethersound Network

Connectors...... Female XLR; Male XLR loop

Nominal impedance...... 10K ohm

**DSP** 

**NETWORK** 

Type ...... Ethernet

AC power

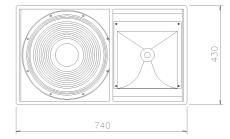

Connectors...... Female PowerCon, in; Male PowerCon loop

Input voltage ...... 115V - 250V nominal +/- 10%

Input voltage selection ...... Automatic

**MECHANICAL** 

Rigging ...... Aircraft L-track fittings, sides and back

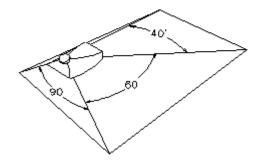

The coverage pattern of the asymmetrical horn.

Vertically 60° and horizontally smoothly changing from 90° to 40°

Low Profil Stage Monitor
